

## *Premium* **Alfalfa Pellets**

Green Meadows forage Alfalfa Pellets are palatable 1/4" pellets that are easy to feed and store. On average most horses comfortably consume 2% of their body weight in dry forage per day. This equates to 20 lbs. of dry forage per day for a 1000 lb. horse. Green Meadow Forage recommends that you weigh the proper amount. Green Meadow Forage also recommends that pelleted and cubed forage not be the sole source of forage since feeding some long-stem forage (hay) may help eliminate boredom and prevent stall vices.

Feed Green Meadows Alfalfa Pellets at a minimum rate of 1.5% of body weight per day. Green Meadows Alfalfa Pellets is recommended to be fed wet, soaked in water for 30 minutes or until properly softened, for horses that have dental problems or for horses that aggressively consume their feed.

Gradually replace existing hay with Green Meadows Alfalfa Pellets over a 7-10 day period. Replace existing hay on a 1 to 1 basis Green Meadows Alfalfa Pellets.

Never feed moldy or insect infested forage to horses. Always provide free-access to fresh, clean water.
