Guaranteed Analysis

Crude Protein	Min 8%
Crude Fat	Min 1.5%
Crude Fiber	Max 35%

Ingredient: Naturally Sun-Cured
Premium Timothy Grass Forage.

On average most horses comfortably consume 2% of their body weight in dry forage per day. This equates to 20 lbs of dry forage per day for a 1000 lb horse. Green Meadow Forage recommends that you weigh the amount of forage provided to each horse to ensure you are feeding the proper amount. Green Meadow Forage also recommends that pelleted and cubed forage not be the sole source of forage since feeding some long-stem forage (hay) may help distribute burrows and prevent stall vices.

Feed Green Meadows Forage Premium Timothy Grass Pellets at a minimum rate of 1.5% of body weight per day. Green Meadows Forage Premium Timothy Grass Pellets is recommended to be fed wet, soaked in water for 30 minutes or until properly softened, for horses that have dental problems or for horses that aggressively consume their feed.

Gradually replace existing hay with Green Meadows Forage Premium Timothy Grass Pellets over a 7-30 day period. Replace existing hay on a 1 to 1 basis with Green Meadows Forage Premium Timothy Grass Pellets.

Never feed moldy or insect infested forage to horses. Always provide free access to fresh, clean water.

Net Weight 40 pounds
